Section 2: MISSION & COMMUNITY SERVED

Mission Statement: The heart of Catholic Medical Center is to carry out Christ's healing ministry by offering health, healing, and hope to every individual who seeks our care.

Has the Mission Statement been reaffirmed in the past year (*RSA 7:32e-I*)? Yes

Please describe the community served by the health care charitable trust. "Community" may be defined as a geographic service area and/or a population segment.

Service Area (Identify Towns or Region describing the trust's primary service area):

Catholic Medical Center defines its primary service area as the towns and cities of Auburn, Bedford, Candia, Deerfield, Dunbarton, Goffstown, Hooksett, Londonderry, Manchester, and New Boston. In addition, Catholic Medical Center includes the towns of Amherst, Bow, Chester, Derry, Allenstown Merrimack, Raymond and Weare in its secondary service area and provides speciality care services to all New Hampshire residents.

Service Population (Describe demographic or other characteristics if the trust primarily serves a population other than the general population):

Catholic Medical Center is a not for profit, tax exempt licensed 330 bed full service hospital with an affiliated medical staff of approximately 500 physicians serving the residents of the greater Manchester area and throughout New Hampshire. We serve as a sophisticated acute care hospital providing high-quality, cost-effective services, delivered in a caring and personal manner. Along with the sophisticated clinical quality and leading edge medical technology, Catholic Medical Center provides vital programs and services to meet the needs of our community's most vulnerable, and the health needs of our region overall.

Catholic Medical Center has a lengthy heritage of services and programs that are of benefit to the community, with a particular emphasis on those most in need. Catholic Medical Center's programs are designed to improve the health status of community residents through community collaborations, education programs, nurse/professional consultations, health screenings, and wellness programs. It is the home of Poisson Dental Facility, The Pregnancy Care Center; Healthcare for the Homeless, The Doorway of Greater Manchester, the Parish Nurse Program, Medication Assistance Program, Women's Wellness & Fertility Center, Emergency Room, Behavioral Health services and the Breast & Cervical Cancer Screening Program. In addition, Catholic Medical Center has the Roots for Recovery Program and the Special Care Nursery which is a state-of-the-art neonatal facility designed to meet the distinct needs of our babies and their families. Catholic Medical Center is a long-time supporter and provider of community based programs designed to care for the uninsured, the disenfranchised and the poor.

The population of the Greater Manchester HSA is changing. The HSA is aging and becoming a more diverse, with residents reflecting a variety of nationalities, languages, ethnic traditions, religious beliefs, and ideologies.

The 65+ population within the HSA is projected to realize a 22% growth through 2019, and many other towns within the HSA will experience over 30% growth in the 65+ age group. Unlike the increase in the 65+ population, the pediatric population (ages 0–17) within the Greater Manchester HSA (excluding the City of Manchester) is projected to realize a slight

decline over the next five years. In contrast to the HSA, the City of Manchester's pediatric population is projected to realize an increase of about 2%.

As stated above, the HSA is becoming a more diverse population, with residents reflecting a variety of nationalities, languages, ethnic traditions, religious beliefs, and ideologies.

Manchester continues to welcome refugees into the city. Since 2008, Manchester has welcomed over 1,500 refugees. The majority of racial diversity in the Greater Manchester HSA is within the city of Manchester, as the city has nearly 86% of the minority population of the HSA residing within its boundaries.

One outcome of the increase in refugees over the past seven years is that 80 languages are now spoken in the Manchester school system. Over the past five years an average of 1,800 students in the Manchester school system are considered to have Limited English Proficiency (LEP), including 1,968 in the 2018-2019 school year.

The City of Manchester also has a significantly higher percent of individuals and children living below poverty, 14.9% and 21.4%, respectively, than other towns in the HSA and the state. Since poverty is highly associated with increased health risk behaviors, low educational attainment, poor health status, unemployment, and a lower self-reported quality of life, this is important to understanding the community we serve.

Low socioeconomic status for youth is associated with higher hospital admission rates, lower utilization of preventive services, and higher rates of chronic disease. A measurement to assess youth poverty is the number of students enrolled in free or reduced meal plans in schools. Fifty-seven percent (7,300) of Manchester students are enrolled in the free and reduced meal plans. This is significantly higher than the state of New Hampshire.

Homeless children have a higher risk of health conditions than those with a stable home. During the 2017–2018 school years the Manchester School District identified 662 students who were homeless, representing more than 6% of the total student population.
